DevOps Services: Infrastructure, Automation, Monitoring

Price list for setting up infrastructure processes for your project. Each service is available in two formats: a basic setup or a full package with documentation and additional integrations.

| Plan         | What's included                                                                                                                      |
|--------------|--------------------------------------------------------------------------------------------------------------------------------------|
| Basic        | Task-specific setup: working configuration, minimal documentation, tested on your server/repository                                  |
| Full Package | Everything in Basic + extended documentation + notifications/alerts + 1 round of revisions after delivery + short usage consultation |

## Pricing by Service

| # | Service                    | Basic | Full Package | Timeline | Extra in Full Package                                    |
|---|----------------------------|-------|--------------|----------|----------------------------------------------------------|
| 1 | Containerization (Docker)  | \$40  | <b>\$120</b> | 1-3 days | Docker Compose for multiple services + registry push     |
| 2 | CI/CD Pipeline Setup       | \$55  | <b>\$155</b> | 2-4 days | Multi-env (dev/stage/prod) + automated tests in pipeline |
| 3 | Monitoring & Alerting      | \$60  | <b>\$155</b> | 2-4 days | Telegram/email notifications on failures                 |
| 4 | Automated Backup System    | \$40  | <b>\$100</b> | 1-2 days | Schedule + restore procedure + restore test              |
| 5 | Log Aggregation & Analysis | \$55  | <b>\$130</b> | 2-3 days | Search/filters + alert on error spikes                   |

\* Work is performed on your server/repository (access provided by client) or in a demo environment. Cloud resource costs (server, domain) are paid separately by the client. Bundled projects (multiple services at once) — discount negotiable. Prices converted from RUB at approx. 84.5 RUB/USD (Sept 2026).
